Privacy Protection

The baby monitor designed with love, for love

We understand how new parents want the best for their babies, so we do our best to provide the best. The Baby Monitor 1 has undergone countless designs and redesigns, as well as rigid lab testing before we finalize every little detail.

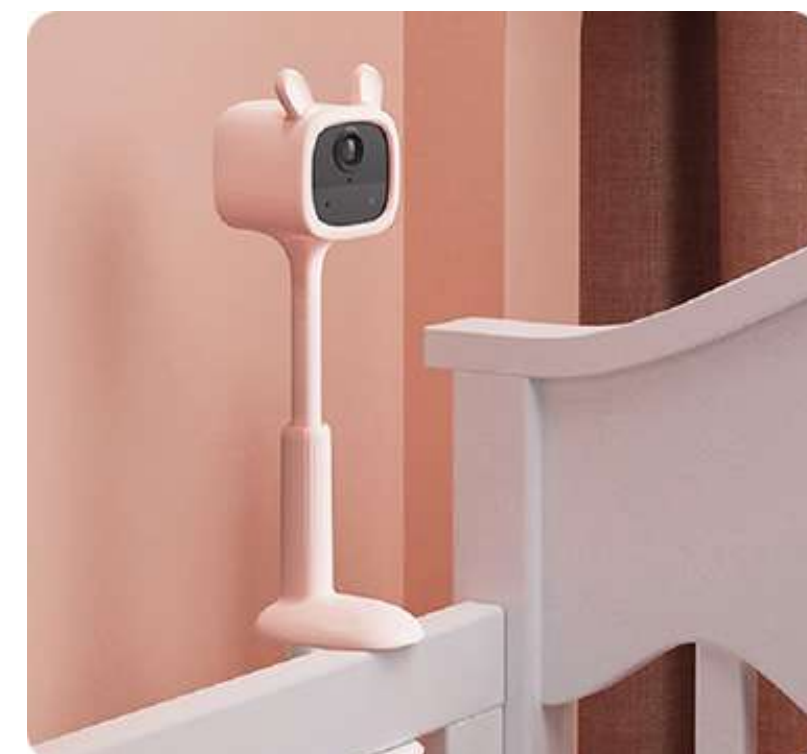

Two cute options for any room

This cute and petite accessory harmonizes with any baby's sleeping area. Choose between the two color versions, or just get both for different rooms!

Made with baby-safe materials

With non-toxic silicone with no sharp edges on the camera body, the Baby Monitor 1 is safe to use anywhere with little ones.

Zero wire, zero worry

With a 100% wire-free setup, the Baby Monitor 1 keeps curious tiny hands or walking toddlers away from dangerous cords.

Goes anywhere near your baby, with no strings attached.

By the bed

You can easily clip the camera to the crib and adjust its bracket to find the best viewing angle to cover the crib.

Near the play area

When your baby is having some fun, you can put the camera on any table, and the Baby Monitor 1 will watch over the whole large area with its wide-angle lens.

On family trips

When you need to spend some quality time in a vacation house or to stay over at the grandparents', the Baby Monitor 1 can easily go with you.

It gently guards every sweet dream

We know parents all have bedtime battles. That's why the Baby Monitor 1 was designed with great detail to protect those precious sleeping hours.

Zero visible infrared lights

The Baby Monitor 1 blends into the serene darkness, offering crystal clear night vision without upsetting baby's sleep with any red or flashing lights.

All-night battery¹

Though it's one of the smallest battery cameras in the market, the Baby Monitor 1 optimizes response time to detect your baby's activities and alert you – even while ensuring all-night operation.

Talk and comfort in an easier way

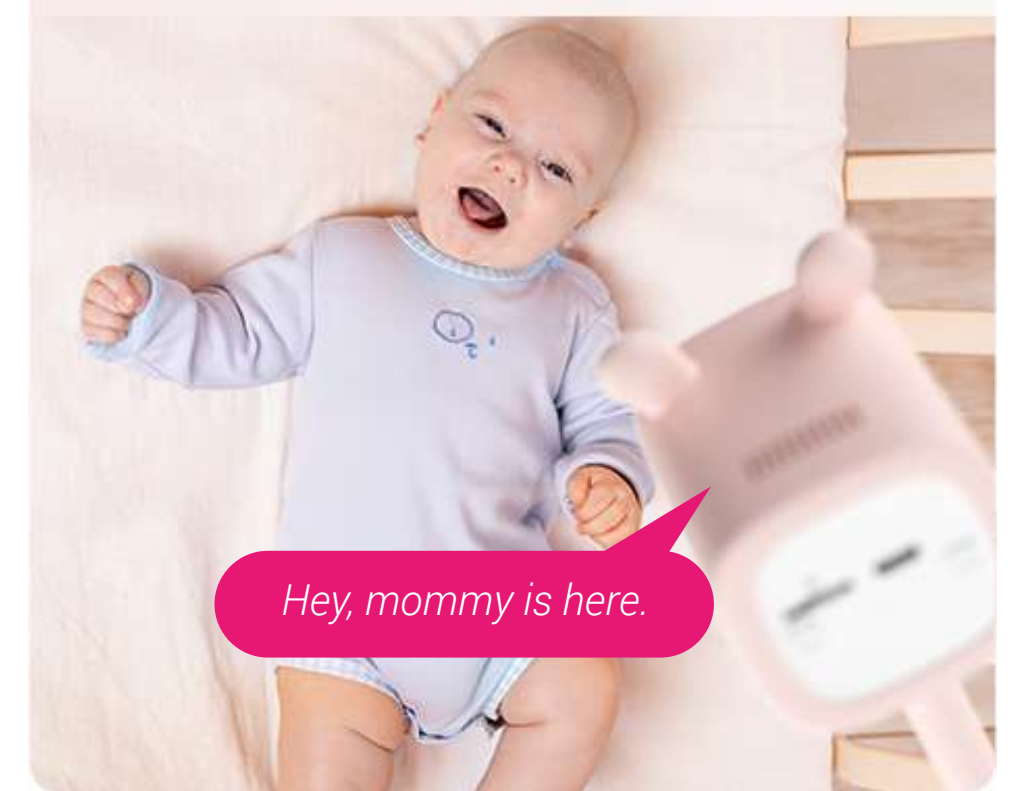

If you can't reach the baby right away, the Baby Monitor 1 can be helpful. Upon detection of a crying sound, the monitor can auto-play soothing music to help calm them down. Also, parents can talk to their baby through the camera just as if they were by the baby's side.

Auto-Play Soothing Music
Upon Crying Detection

High-Quality
Two-Way Talk

See and interact via bigger screens

With the EZVIZ App, you can see every detail in Full HD 1080p quality. What's better, for parents who want to multi-task while babysitting, they can initiate the live feed simply by saying "Hey Google" or "Alexa."

Alexa, show me the Baby Room.

A visual baby diary made of precious moments

First words, first steps, every big smile... the Baby Monitor 1 ensures that you capture those unforgettable moments and store the memories safely³.

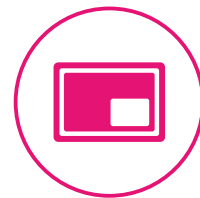

Supports MicroSD Card

Supports EZVIZ CloudPlay Storage

Additional useful features to relive the moments

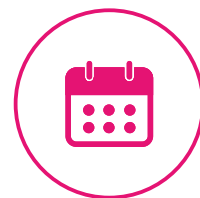

Share within family accounts (Account verification required)

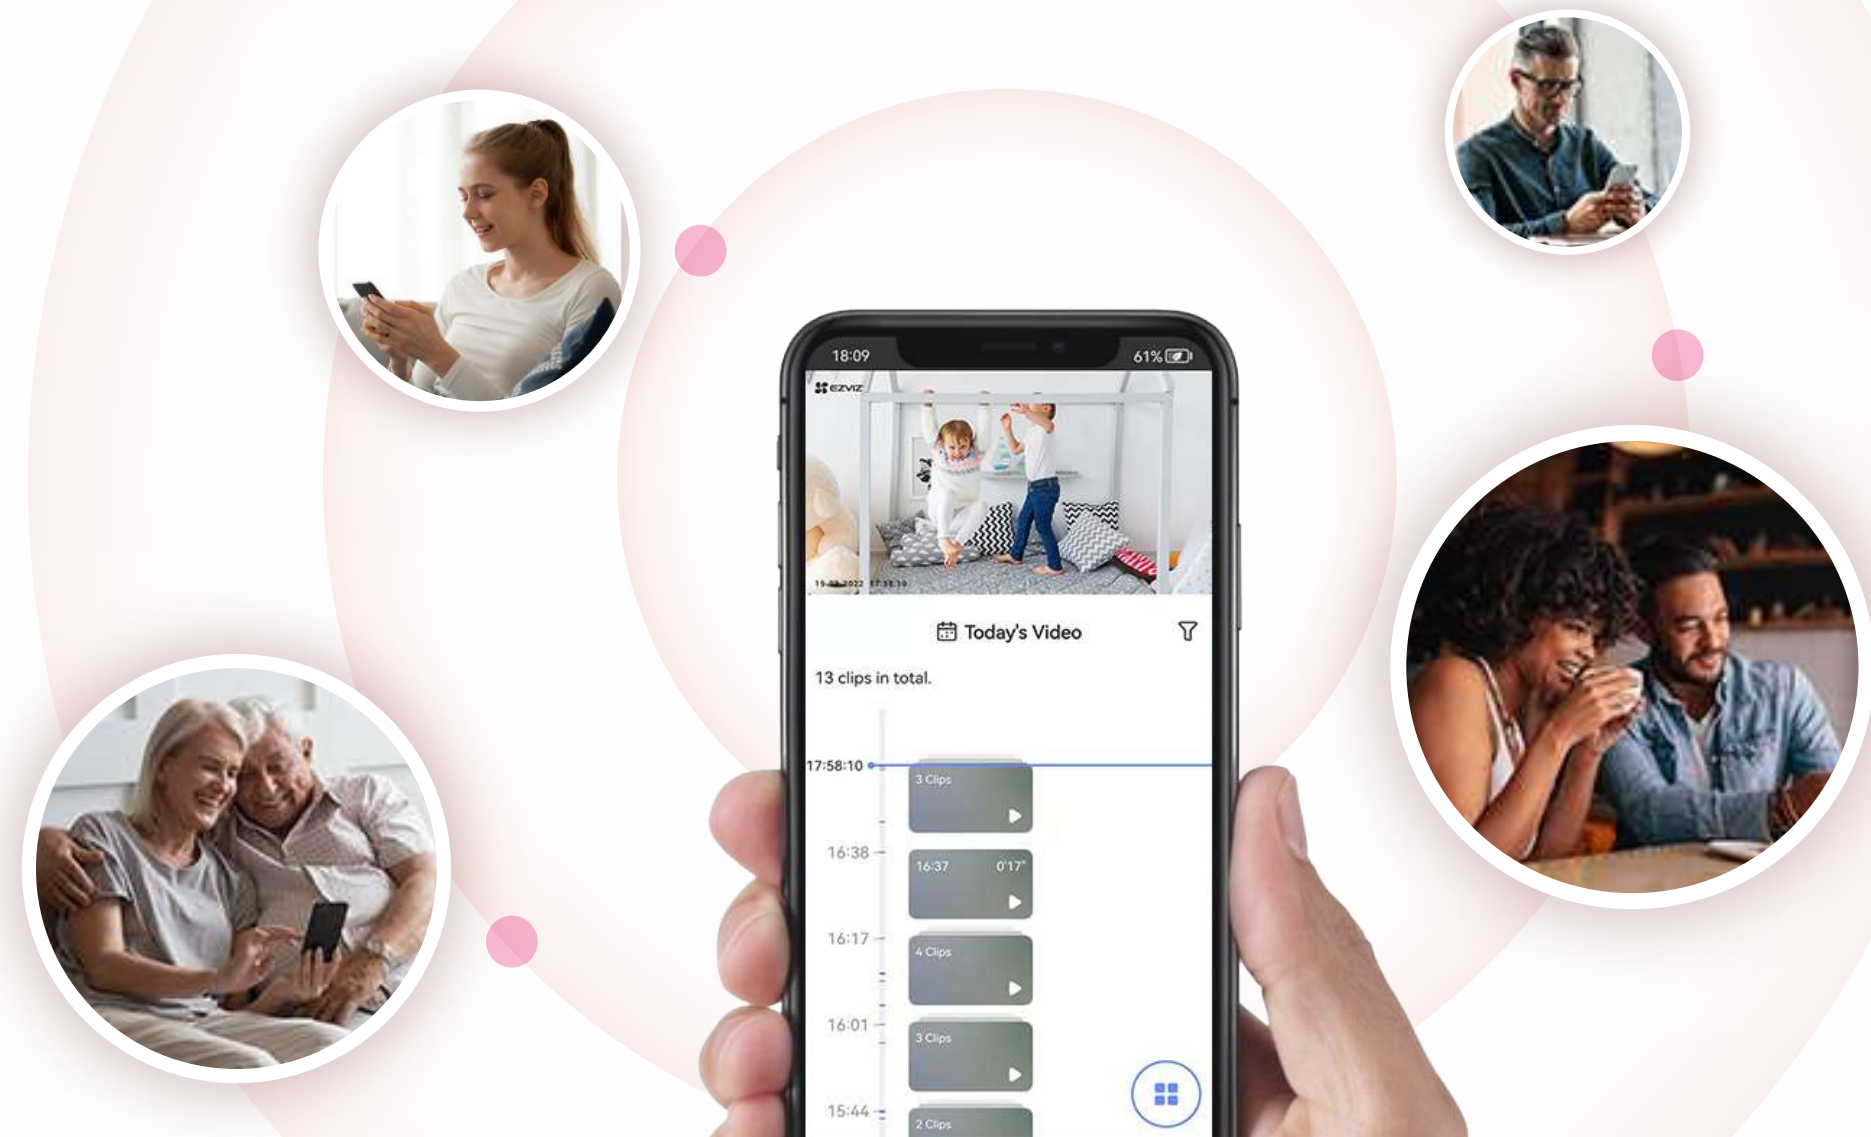

Multitask with the picture-in-picture mode

Look closely with up to 8x zoom

Video history with easy download

We do our best to protect your data and privacy
